PRESS RELEASE –
FOR IMMEDIATE RELEASE

AREA PROJECT MANAGEMENT PROFESSIONALS ESTABLISH CONSULTING FIRM

HAMPSTEAD, NH, 3 FEB. 2006 – Two experienced project managers have combined to establish a new project management consulting company to serve organizations in southern New Hampshire, northern Massachusetts, and the greater Boston area.

Nick Pangaro and Terry Yetsko, who both hold Project Management Professional (PMP®) certifications from the Project Management Institute (PMI®), have started **NE Project Management Consultants, LLC** to provide project management consulting services to companies within the Technology, Engineering, and Financial Services Industries. NEPMC's mission is to assist businesses to rapidly and measurably improve performance on projects, resulting in increased efficiency, higher project success rates, and corporate profitability.

“From our experience and discussions with our business contacts, we've found that many companies need to bring project management procedures and discipline to their projects.” said Mr. Yetsko. “Our consultants work with these companies as an extension of their own staff to bring the necessary discipline and structure, and increase their project success rate.”

Mr. Yetsko has over 25 years experience in engineering and program management, managing projects ranging from production and custom test equipment to control systems for both the extrusion coating industry to high powered radio-navigation transmitters. Mr. Pangaro's over 25 years of Project Management experience includes regulatory compliance and waste management projects for several chemical and pharmaceutical manufacturers; business intelligence projects for several clients, and operational process efficiency projects for a large financial institution.

Mr. Yetsko is a graduate of Lehigh University with a B.S. in Electrical Engineering and is currently enrolled in the MBA program at the University of Phoenix. Mr. Pangaro holds a B.S. in Biological Science from William Paterson University, with minors in Chemistry and Applied Statistics.

The PMP Certification is the project management profession's most recognized and respected global credential. There are over 110,000 PMPs worldwide located in almost 120 countries. To obtain PMP certification, an individual must satisfy extensive education and experience requirements, agree to adhere to a Professional Code of Conduct, and pass the PMP Certification Examination.
